

NUGGET ICE MAKER, MODULAR FM-600AKE-R452N-SB

Product series: FM

Item number: F083-C207

The Hoshizaki FM-600AKE-R452N-SB is a modular Nugget ice maker producing up to 530 kg of high-quality nugget ice per 24 hours.

In cocktails, the dry and hard ice nuggets are the ideal cooling agent, as they deliver just the right amount of dilution, especially for strong-spirited drinks like Mojitos and Tiki Cocktails.

The FM-600AKE-R452N-SB uses refrigerant R452A.

Material

The exterior is made of stainless steel. The closed water circuit provides maximum protection against any type of contamination during the entire ice production process. All Hoshizaki machines are easy to use, clean, and maintain.

Unique Technology

The FM series has a worktime-based replacement system, which can be monitored with an intuitive control display for preventive maintenance. Hoshizaki was the first to introduce an automated water circuit rinse cycle, to prevent harmful mineral residues from clogging the hydraulic system and maintaining top sanitary conditions.

Smart Design

Like all Hoshizaki Ice makers, the FM-600AKE-R452N-SB is designed to last and comes with smart design extras. The Nugget ice maker uses carbon graphite bushings instead of conventional ball bearings allowing the machine to work entirely without grease. Here, the absence of moving parts prevents wear and tear, while the water-lubricated bearings protect the system from unpleasant calcification and bacterial contamination.

Flexibility

Need to amp up your production capacity? The variable setup with modular bins and bases allows the user to mix and match a number of devices, depending on individual requirements and conditions.

SPECIFICATIONS

Product title	Nugget Ice Maker, Modular	CO2 equivalent (kg)	2,782
Production Capacity (kg/24h) approx. (AT 10°C, WT 10°C)	530	Cooling System	Air Cooled
Power Supply	1/220 - 240V/50Hz	Product configuration	Modular
Electric Consumption (kW)	1.95	Net Weight (kg)	107
Ice type	Nugget	Gross Weight, Packed (kg)	114
Refrigerant	R452A	Corresponding bin(s)	B140SA, B210SA, B340SA
