

CYLINDER ICE MAKER, MODULAR & STACKABLE IM-240DNE-HC-C

Product series: IM

Item number: M071-D122

This Hoshizaki IM-240DNE-HC-C is a stackable special ice maker producing up to 190 kg of high-quality Cylinder Ice per 24 hours.

Expand your creative horizon and your craft's aesthetic possibilities with the help of our special ice makers that produce different, extraordinary shapes of ice. Specially tailored for cocktail bars that like to differentiate themselves from others, whilst never compromising on taste and quality of their drinks. With perfect ice characteristics still in focus, you can now add a decorative highlight to your cocktails and long drinks.

All special ice makers are equipped with an electronic control system. This ensures an optimized ice-making process, even under varying circumstances. Without additional manual assistance or adjustments required, our Special Ice Makers produce generous amounts of ice cubes, at a consistently high quality.

Sustainable

The IM-240DNE-HC-C uses refrigerant R290.

This natural refrigerant is not only climate-friendly but also boosts the machine, when it comes to performance and production capacity.

Material

The exterior is made of stainless steel. The closed water circuit provides maximum protection against any type of contamination during the entire cubing process. All Hoshizaki machines are easy to use, clean, and maintain.

Unique Technology

A dedicated jet of fresh water is injected into each of the closed cells. Excess water leaves the closed cell through a set of outlets. The cell walls block the freezing water's expansion from all sides while reaching down to -30°C during the cubing process. Thanks to the automatic rinse cycles, impurities such as minerals, are eliminated from the water resulting in the purest ice possible while your machine is protected from calcification and mineral build-up.

Smart Design

Like all Hoshizaki Ice makers, the IM-240DNE-HC-C is designed to last and comes with smart design extras such as a magnetic water pump without direct coupling. This element prevents leakage from the water circuit and improves the life expectancy of the machine.

Perfect Fit

Need to amp up your production capacity? These ice makers can be stacked and combined with modular bins and bases. This allows the user to mix and match depending on individual requirements, ice consumption, and space conditions. The dimensions of the IM-240DNE-HC-C are mm.

Plug&Play

The smart plug-and-play design guarantees an easy and quick set-up.

SPECIFICATIONS

Product title	Cylinder Ice Maker, Modular & Stackable	CO2 equivalent (kg)	0,441
Production Capacity (kg/24h) approx. (AT 10°C, WT 10°C)	190	Cooling System	Air Cooled
Power Supply	1/220 - 240V/50Hz	Product configuration	Stackable
Electric Consumption (kW)	0,93	Net Weight (kg)	85
Ice type	Cylinder	Gross Weight, Packed (kg)	99
Refrigerant	R290	Corresponding bin(s)	B340SA, F_1025_52S, F_650_44S, F_950_48S
